The risk indicator SRI rates this fund on a scale of 1 to 7. This indicator is used to assess the level of risk of this product in comparison to other funds and a category 1 rating does not mean that the investment is risk free. In addition, it indicates the likelihood that this product will incur losses in the event of market movements or our inability to pay you. This indicator assumes that you hold the product until the end of the recommended holding period of this fund. The actual risk may be very different if you choose to exit before the end of the recommended holding period of this Fund.

Climate alignment (°C)

Fund	1.60
Benchmark	2.08

Climate alignment (°C): the global warming trajectory (°C) of each company in the portfolio based on its carbon footprint (scopes 1, 2 and 3*), the efforts undertaken to reduce it and the strategy announced to contribute to the fight against global warming. The trajectory is derived from the individual company's performance compared to a warming trajectory of the global economy of 1.5°C. The trajectories of the companies in the portfolio are then aggregated. Ratios as of 31/07/2024

GLOSSARY

The VOLATILITY of a security is the difference between performance and average performance and therefore makes it possible to gauge the consistency of performance obtained. It comprises a measure of risk. If this is zero, the individual performances are identical. The higher it is, the greater the difference between individual performances.

The TRACKING ERROR shows the volatility of a fund's relative performance against that of its benchmark. It shows the difference between performances and their average and so makes it possible to gauge the consistency of relative performance. The lower the tracking error, the closer the fund's performance is to that of its benchmark.

The ALPHA corresponds to the fund's average performance. More specifically, it measures the fund managers' added value while cancelling out market influence, which cannot be controlled. This measure is expressed as a percentage.

The SHARPE RATIO shows the fund's outperformance against a zero-risk interest rate, adjusted for fund volatility.

Other definitions and methodologies are available at www.edmond-de-rothschild.com under the "Fund Center" tab in the fund's downloadable factsheet documentation.
